

# TitanPower TP-2000 — Diesel Generating Set

Submitted by Apex Power Systems · Heavy-Duty Standby Power

Submittal No. APX-GEN-0117 | For Approval

Apex Power Systems is pleased to offer the **TitanPower TP-2000**, a heavy-duty standby diesel generating set proven across hundreds of mission-critical installations worldwide — robust, cost-effective emergency power with a compact footprint and rapid deployment.

## 1. Engine & Alternator

The TP-2000 pairs a turbocharged diesel engine with a brushless alternator. The set is offered with a weatherproof acoustic enclosure and an integrated sub-base fuel tank for autonomy.

## 2. Guaranteed Technical Particulars

| Item | Particular                 | Offered Value                                       |
|------|----------------------------|-----------------------------------------------------|
| 2.1  | Standby rated power        | 2000 kW                                             |
| 2.2  | Output voltage / frequency | 11 kV, 50 Hz, 3-phase                               |
| 2.3  | Emissions certification    | <b>EPA Tier 2</b> (meets local site requirements)   |
| 2.4  | On-site fuel autonomy      | <b>8 hours</b> at 100% load (1,100 L sub-base tank) |
| 2.5  | Start & load acceptance    | Full load within <b>30 seconds</b> of start signal  |
| 2.6  | Configuration offered      | <b>Single set (1 × 2000 kW)</b>                     |
| 2.7  | Acoustic enclosure         | 82 dB(A) at 1 m                                     |
| 2.8  | Governor                   | Electronic isochronous, ±0.25%                      |

## 3. Compliance Statement

Apex Power Systems confirms the TP-2000 meets or exceeds all applicable performance and emissions standards for the project and is offered as **fully compliant** with the specification. Extended-run fuel tanks and parallel switchgear are available as options on request.
